

Dear Employer:

The Office of Career Services at National-Louis University is designed to assist students define and achieve their career goals. Through that process we offer resources that assist in interviewing and networking.

Our Employer On-Campus (EOC) program is offered as a means for your organization to attract qualified candidates for internships and full-time career opportunities. Through the EOC program, you have a hand in grooming the student into becoming an employee. Through a variety of formats, the Employer On-Campus program allows you the opportunity to engage the student by offering *informational sessions* on topics critical to your industry. You may then have the opportunity to speak with a small group of students, or schedule to meet with students individually whom are eager to learn and market themselves to your recruiting personnel.

National-Louis University has a diverse student population. 92% of our classes are comprised of less than 20 students. We have over 60 academic programs including education, psychology and human services. We meet our nontraditional students on campuses throughout Illinois and are committed to providing access to quality higher education.

If your organization is interested in participating in an EOC program, please contact us at 312-261-3270 or e-mail careerservices@nl.edu for event options. We look forward to working you.

Kind regards,

James Opon, Director
Office of Career Services
National-Louis University
