2 - Provide information concerning the edTPA: Describe the program changes that have been implemented using edTPA data. (5000 character max)

In the design of the new MAT Middle Grades Program (Grades 5-8) (approved by SEPLB in December 2015, key assessments have been aligned to the requirements of the edTPA, as well as to the 2013 IPTS and 2012 AMLE Standards. The intentional alignment of the edTPA to the program's assessments provides candidates with scaffolded practice and continual support throughout the program prior to the actual submission of the edTPA in MGE590: Student Teaching. The edTPA informs faculty of candidates' readiness to enter the field by providing information regarding their ability to plan, instruct, and assess middle level student learning. MAT MGE faculty will aggregate and analyze edTPA results to look for strengths and weaknesses in candidate performance and to inform program modifications.

3 - Describe how program faculty review assessment data throughout the program (content knowledge, pedagogical knowledge [specifically, instructional planning and candidate impact on student growth], clinical experience (this may include fieldwork and student teaching and dispositions). (5000 character max)

NCE requires all of its programs to annually report, review, and reflect upon the data collected and aggregated from program signature assessments which include assessment of: content knowledge, pedagogical content knowledge, instructional planning, candidate impact on student growth, clinical experience, candidate dispositions, diversity proficiencies, and technology proficiencies.

Review of the data occurs throughout the academic year, at the end of each quarter and cumulatively at the conclusion of the academic year as program faculty view and analyze the aggregated data from signature assessments completed by their candidates. Comparisons are made from reviewing present and past data, especially examining areas where the data indicates that candidates are not fully meeting outcomes as expected at the mastery level.

Additionally, data collected at transition points in the program are reviewed by faculty. Transition points refer to the benchmark experiences in the program where signature assessments are implemented (beginning of program, middle of program and end of program). Reviewing assessment data at these transition points allows program faculty the opportunity to determine candidate outcomes related to performance and ongoing development toward the overarching goal of becoming an effective professional and their impact on PK-12 learning. Discussion and goal setting take place for setting up a plan for improving curriculum, instructional strategies, assignments, assessments and rubrics as well as program development as a means for assisting candidates in their continued development and growth as educators.

In the autumn of the academic year, all NCE programs submit their annual program assessment reports to the NCE Assessment Committee which is comprised of faculty from across the college. This committee reviews program assessment reports using a rubric that is designed to provide feedback to faculty in each program. Program faculty review the feedback and use it to assist in further refinement of signature assessments and data analysis.

4 - Provide an update of program changes from the previous academic year; which program changes, if any, were made/approved during the reporting period. (5000 character max)

MAT MGE Teacher Residency program was approved along with the MAT MGE Traditional program in December 2015. The first cohort for the Teacher Residency began in summer 2016. Based on data collected from the first cohort of MGE candidates, we will consider changes for next year.
